IKT103 exam checklist

I have completed every requirement, and I think the program turned out very well. Because of this as well as the fact that I believe I have completed 100% of the project requirements my suggestion for a grade is an A.

/	5% Design the database to keep track of cars, customers and car to customer assignments
~	5% Document the database with UML (deliver with the code)
~	5% Create the GUI for managing cars (add, edit, remove)
